IT TAKES A VILLAGE TO RAISE A CHILD
Do stronger communities lead to stronger young people and a stronger society?

COMMUNITIES IN CONTROL CONFERENCE
7 & 8 APRIL 2003

FIONA STANLEY AC FAA FASSA

(*If quoting from this speech, please acknowledge that it was presented to the Communities in Control conference, convened by Our Community and Catholic Social Services.)

OUTLINE
1. Pathways to stronger children and youth
2. Changes in contemporary Australian society impacting on children and youth
3. It takes a village to raise a child
   Role of community in ameliorating adverse effects of our contemporary society and enhancing child development
4. Towards a stronger society
Canadian Studies on Childhood vulnerability
(Index of cognitive & behavioural capacity D Willms, 2002 "Vulnerable Children")

→ 28.6% of all Canadian Children
→ Association with family income less strong than previously believed
→ Maternal education most important aspect of SES
→ Good parenting far outweighs effect of low income
→ Family environment far outweighs mothers working outside of the home
→ Neighbourhood support important to enrich family and help parents
→ Schools and communities very important
→ Children from low income families benefit most from day care
→ Considerable variability in vulnerability between communities

Parental income and mental health problems in 4-16 year old children
WA Child Health Survey

*each quintile represents 20% income distribution across families
Impact of white colonisation on Aboriginal health today

Changes in contemporary Australian society impacting on children and youth

Changes in Australian Society

→ Divorce, Single Parents, Blended Families
→ Conflict, violence, isolation, homelessness
→ Smaller families, contraction of the extended family
→ Mothers working, childcare
→ Children needing fostering
→ Child Abuse and neglect
→ Insecure neighbourhoods, decreased connections
→ Decreased social capital (trust, cooperation, civic engagements & reciprocity)

Indicators of development, health and wellbeing in Australian children

1970s-2000s

- Preterm & LBW births
- Developmental disorders
- Complex diseases (asthma, diabetes, obesity, autism)
- Behavioural problems
- Child abuse/neglect
- Mental health problems
- Educational problems
- Drug and substance abuse
- Juvenile crime
- Youth unemployment

Reasons for divorce in Australia

The most common themes associated with marital breakdown:

- Unemployment and work related problems
- High risk factors within marriages such as addictive behaviours, chronic illness, or death of a child
- Blended families
- Marriage and r’ship breakdown in the extended family
- A redefinition of gender roles and feminist agenda of equality
- The growth of individualism
- Poor communication skills
- Poor parenting skills
- Domestic violence, and
- Social isolation
Suicides: 15-19 year olds
1960 - 1998

Mental Health

Age specific suicide rates 1996-98 (WA, SA & NT)

Increase in Child Abuse
Causes of Child Cerebral Palsy in WA

Juvenile Crime - Violent Assaults

Males
- 1973-74
- 1993-94

Females
- 1973-74
- 1993-94

Juvenile
- 1973-74
- 1993-94

Adult : juvenile arrests
- Males: 2.1 : 1, 1.2 : 1
- Females: 3.4 : 1, 1 : 1.9

Boys : girls arrested
- 24 : 1, 4.4 : 1

Homeless Inc 2001
Literacy Disparity

As children move from year 3 to year 5, the disparity among those meeting literacy standards grows.

Achievement of TEE

Students who achieved Tertiary Entrance Rank (required for entry to a WA public university)

- Indigenous Students: 7.5%
- Non-Indigenous Students: 34.4%

SOURCE: P38 Department Education WA Annual Report 2001-2002
Is there a common theme here?

The Welfare Squeeze

Contemporary Australia 1970-2000’s
Influences which disorganize developmental processes of childhood, such as:

→ Violence-close, regular, long standing, particularly negative effects
→ Patterns of family work – excessive hours reduce parental commitment
→ Disengaged and inconsistent parenting
→ Family mobility
→ Few social supports

Their impact on child development strongly influenced by local community factors which collectively support child rearing.

It takes a Village to Raise a Child

Role of community in ameliorating adverse effects of our contemporary society and enhancing child development

COMMUNITY
• Any group of people with interests in common: history, geography, culture, religion, particular interest or circumstance.
  - neighbourhoods
  - friends
  - schools
  - workplace

**Role of Community**

• Social capital refers to the quality and depth of relationships between people in a family or community.

• Those processes and conditions are manifested by four interrelated constructs: trust, cooperation, civic engagement, and reciprocity.
EXAMPLES OF COMMUNITY INITIATIVES

• Ngunytju Tjitji Pirni (NTP)

• Jigalong & Burringurrah

Indigenous perspectives on prevention

1. Must be grounded in an Aboriginal worldview, be community driven, and focus on a 'whole-of-community-in-context' approach
2. Must acknowledge the relevant historical, cultural, social and political forces; and the implications these have had for child, family and community development
3. “It is the community that needs to develop ideas that address the educational, health and recreational needs of its people, so that individuals are empowered to engage in the solution of their own problems and those of their families and communities” (Noel Pearson 2000)
Mobilising community action for better outcomes for children and the community

3. Realistic funding to achieve short & longer-term results

4. People and infrastructure to facilitate & maintain local action

1. Culturally appropriate community democracy

2. Less fragmented essential social services

5. Local action plan for children and community development

Towards a Stronger Society

Your Question:
Do stronger Communities lead to stronger young people and a stronger society?

My Question:
Can communities and society be strong if our children and young people are not?

PURPOSE OF ALLIANCE

A National collaborative established to facilitate, coordinate and support the development of knowledge and its effective use to enhance the well-being and life chances of children and young people.

ALLIANCE GOALS

• To promote collaborative research and agenda setting
  AND
• The application of research to policy and practice for children and young people
